

# KILN DRIED SAND

## DATA SHEET

Updated January 2019

**Kiln Dried Sand is the easy way to achieve strong, secure paving.**

It is suitable for a variety of applications and can be brushed directly from the bag.

It is available in showerproof, tear-resistant plastic packaging within the UK.

## APPLICATIONS

---

Kiln Dried Sand is suitable as a jointing or grouting sand for block paving projects, the laying and bedding in of paving slabs and as a dried building sand.

## PROPERTIES

---

Kiln Dried Sand is kiln dried, factory produced and is graded and controlled in accordance with BS 7533 - 3:2005.

## STORAGE

---

Kiln Dried Sand should be stored in unopened bags clear of the ground, in cool dry conditions and protected from damp, frost, heat and excessive draught.

## COVERAGE PER BAG

---

Kiln Dried Sand is ready for brushing directly from the bag and each bag will cover approximately 5m<sup>2</sup> of standard block paving. We recommend that Kiln Dried Sand is not used in wet or damp conditions.

## HEALTH AND SAFETY

---

Kiln Dried Sand is an inert material and inhalation of dust particles must be avoided by wearing suitable dust masks and personal protective equipment. Kiln Dried Sand can cause irritation to sensitive skin so avoid contact by wearing gloves and other suitable protective clothing. For further information refer to the appropriate **Breedon Cement Material Safety Data Sheets**.
